

PIONEER Shrink Fit with X Coolant

PIONEER X Coolant are angled Jet-Blast coolant holes for around solid cutting tools. PIONEER's design uses a pluggable approach, coolant when you need it down the center or around the cutting tool.

Cross connecting holes are plugged with screws for easy clean out if chips become logged into the coolant holes.

Available in:

- BT30 Dual Contact
- BT40 Dual Contact
- CAT40
- CAT40 Dual Contact
- HSK063A

In select sizes...

Remove screws for Jet-Blast

2 Pluggable Angled Coolant Ports

Visit www.PioneerNA.com and look for an "X" at the end of the part number for X Coolant.
